Vision

By 2020, The Pennsylvania Municipal League will promote Pennsylvania’s municipalities as vitally important to the quality of life in every community of the Commonwealth.

The League will be recognized in the State Capitol and in local communities as the preeminent voice for municipal government, especially its core communities.

The League will enhance professional development of locally elected and appointed public officials, necessary to provide the highest level of service for Pennsylvania’s communities.

The League will increase the number of municipal members, especially core communities throughout the Commonwealth, including cities, townships and boroughs.

The League will engage members in advocacy, services and program development to best serve their 21st century needs.

The League will encourage local governments to improve their effective and efficient delivery of services individually, as well as through inter-municipal cooperation.

The League will establish an endowment through the Center for Municipal Development to perpetuate ongoing and quality professional development of municipal leaders.

The League will successfully advocate for structural reforms to financing municipal services, through an engaged membership, leadership from the Governor and the General Assembly, and partnerships with organizations, corporations and educational institutions who share our vision for the future.
